Coffee Makers

Operating Instructions:

1. Fill coffee pot with **COLD** water.
2. Add **percolator-grind** coffee to the basket (don't use a filter).
3. Plug the coffee pot in. If the pot has a switch, turn it on.
4. When the coffee has finished brewing, it stops making the banging sound every few moments. Leave the pot on to keep the coffee hot.

AVOID PROBLEMS: Coffee makers use a lot of electricity (14 amps)!

- * Avoid using extension cords.
- * Don't run other appliances from the same outlet.
- * If the coffee maker makes warm brown water instead of hot coffee, the coffee maker is not getting enough electricity. Plug the coffee maker directly into the outlet, without any extension cord. Make sure nothing else is drawing power from the same circuit. Turn off unnecessary lights and appliances running *anywhere* in the same building.

Cleaning instructions:

Rinse the pot and the basket before returning.
NEVER IMMERSER THE URN ITSELF IN WATER.

Brewing Times:

About 30 min. for a 30-cup pot, 45 min. for a 55-cup, and 1 hour for a 100-cup pot.

Measuring the coffee:

<i>Cups of coffee:</i>	<i>Coffee Measure:</i>	(One pound of coffee
30	2 cups	measures out to
55	3½ cups	about 4¾ cups)
100	6 cups	

If you have any questions or problems, please call immediately.

Thank you for renting from Taylor Rental Have a great party!
